

TITLE

FRUCTAN BIOSYNTHETIC ENZYMES

ABSTRACT OF THE DISCLOSURE

This invention relates to isolated nucleic acid fragments encoding

5 fructosyltransferases. More specifically, this invention relates to polynucleotides
encoding 1-FFT, 6-SFTs, or 1-SSTs. The invention also relates to the construction
of a recombinant DNA constructs encoding all or a portion of the
fructosyltransferases, in sense or antisense orientation, wherein expression of the
recombinant DNA construct results in production of altered levels of the
10 fructosyltransferases in a transformed host cell.
